

Gipro X-TYPE

product overview

The all new Gipro-X from HealTech Electronics Ltd. is the third Gipro variant in the range.

This **Gear Position Indicator** will fit ALL motorcycles and vehicles with electronic ignition and 5 or 6 speed gearbox.

Due to a modern microprocessor and sophisticated firmware, the Gipro-X offers faster and more reliable readings than competing products.

Same size as the Gipro-DS this is also the **smallest, most compact gear indicator** on the market, making it easy to mount at the instrument cluster. Just the perfect size.

It has a **clear front face** which goes along nicely with the factory instruments.

The product is available with Red, Blue, Green, Yellow and White LED display.

We offer **bike specific looms** to make the installation quick and simple.

The modul is **auto learning**, there are no buttons and no “programming wire”. Just go through the gears and you are done.

Programmable **Shift Light** function as well as **High Speed Warning** feature is included. You won't find this feature set in other products.

The product is rugged, 100% weatherproof and comes with 2-years replacement warranty.

Suggested retail price (incl. wiring harness): US \$132.99 / 89.00 EUR
